E-FORCE3 BATTERY TOOLS

WEBERRESCUE
SYSTEMS

E-FORCE3 NEW GENERATION OF BATTERY TOOLS

E FORCE 3

360° rotating and folding handle made from glass fibre reinforced plastic helps minimise storage space requirements.

Plastic handle with optimised gripping surface for secure handling of tool also protects the operator from electric shock up to 1,000 Volts.

All controls in distinctive red for easy location and use.

Additional LED lighting to illuminate the working area.

Uniform point of connection to easily convert hose-connected tools to E-FORCE3 battery units!

Higher speed thanks to a new, even more efficient drive system. Intelligent switching technology between the pressure stage ensures safe work when using.

NEW POINT OF CONNECTION FOR MORE FLEXIBILITY

WEBER RESCUE's new generation of hose-bound cutters, spreaders and combi tools can be converted to E-FORCE3 battery-powered devices at any time via a new point of connection. This means more flexible decision-making. The conversion will be done by a certified workshop.

Buy a hose-bound tool today and upgrade to battery technology tomorrow!

Upgrade from hose-bound to battery technology in only a few steps:

MORE SPEED THROUGH MODERN SWITCHING TECHNOLOGY

Due to the newly developed switching valve the rescue system is always in the maximum possible speed range, comparable to a 2-step automatic transmission that always uses the optimum gear. This increases the working speed by at least 25% – depending on the application, the rescue tool is even much faster.

In addition to the switching valve, the basic speed of the new E-FORCE3 tools is once again noticeably increased.

Raise of performance:
>> higher working speed
>> reduced working time

— output >> working speed
— working pressure
